

# CALIFORNIA FIRESTORMS: Who's geoengineering the statewide conflagration and why?

Posted on July 31, 2018 by State of the Nation

## Operation Gladio Strikes Again

## Directed Energy Weapons, Chemical Geoengineering and Nexrad Transmitters Employed to Create *FIREGEDDON 2018*

State of the Nation

“No one is debating that California has experienced its fair share of natural wildfires over the decades, especially when the Santa Ana winds are blowing. However, the last few years have seen a developing pattern of wildfires and firestorms that have a major manmade component. First, the geoengineers artificially create the weather patterns that push various parts of the state into dry spells and/or full-blown drought conditions. Over the months the dried out vegetation becomes kindling during the wildfire season. Now that everyone knows that forest fires and brush fires start spontaneously during the hot months, the geoengineers utilize fire-starting technologies that literally act as “*flamethrowers*” that “*rain down fire from the skies*”. Of course, depending on their specific targets, the environmental terrorists will also employ arsonists strategically placed on the ground.”

— Intelligence Analyst & Former Military Officer

---

## **2018: Year of the Pyromaniac**

It's critical to understand the global context that has been painstakingly fabricated by the NWO globalist cabal. They have created a worldwide enterprise that employs a cadre of geoengineers who are capable of manufacturing any weather pattern they so desire. These newly predominant weather patterns, then, are used to provide cover for manufactured catastrophic weather events and/or destructive climate trends. See: [WEATHER WARFARE: Globalists Order Geoengineers to "Shock & Awe" America with Superstorms](#)

There are all sorts of geoengineered possibilities for the perps to play with. Hurricanes and tornadoes, earthquakes and volcanoes, mudslides and sinkholes, wildfires and firestorms to name the most commonly geoengineered events. It appears that the cabal has made *environmental terrorism by fire* the preferred weapon for 2018. Not only have we seen the apocalyptic Greek fires this July, North Americans have also witnessed an unparalleled wildfire season in Siberia that brought massive volumes of smoke to Alaska, Canada and New England. See: [Massive Siberian Wildfires Affect North America With Smoke Via Jet Stream](#)

---

There's no question that Planet Earth has experienced an inordinate number of heat waves this year, but that's exactly how the geoengineers work. In order to frame these terror events as false flag operations, the perps piggyback on the natural disaster trend of the year. That trend for 2018 has taken the form of wildfires which can appear initially as forest fires, brush fires and/or grass fires.

2018 has seen another very disturbing pattern of arson fires that were carefully camouflaged as accidents when they clearly were not. The arsonists can be an individual on the ground with a portable flamethrower, a laser-equipped drone in the sky, a satellite-based DEW, or all three. The following report delineates some of those arson fires that were started as a part of Operation Gladio's 2018 terror operations throughout Europe.

---

## **GLADIO: "The SWORD" Used By The North Atlantic Terrorist Organization Worldwide**

Were one to conduct a thorough comparative analysis, 2018 would surely go down in history as the "Year of the Pyromaniac". Only the pyromaniac is not some kid out in the woods with matches. In this case, the firebug is a covert arm of NATO (sometimes known as the *North Atlantic Terrorist Organization*) that goes by the apt name—Operation Gladio. The truth be told, NATO has been behind most acts of state-sponsored terrorism continuously since the end of World War II.

## California Drama Factory

There are very specific reasons why so much calamity happens in the Golden State. The three primary ones are Hollywood, Silicon Valley and the Military-Industrial Complex (MIC).

When the globalists want to send a message to the world — “loud and clear” or subliminally — the California stentors are often the messengers. The Motion Picture Industry provides a particularly powerful medium to both captivate and impress the people, as does TV production. Likewise, much of what we see on the Internet these days is brought to you by the Sultans of Silicon Valley.

---

**KEY POINT:** The major social media platforms have been especially effective at shaping the public discourse on the Internet. The *Global Warming* meme is kept alive and well via all the

major social network utilities. Likewise, Hollywood does not miss a single opportunity to advocate the same cause in many movie and TV productions.

---

More to the point, California has always played an integral role in the social engineering of the American people, as it does the global population. The mainstream media (MSM) is now controlled by many of the biggest IT and social media companies that are headquartered in the Valley. Hence, whoever controls the media controls the message. In the instant case, the key message pertains to *Global Warming*.

Just like other HUGE hoaxes perpetrated against humanity, the *Global Warming* hoax is central to a furtive scheme to form a One World Government. In fact, the primary goal of the *New World Order* agenda is to foist a global government on the entire planetary civilization. The NWO cabal has determined that the best way to meet this objective is to fabricate a universal boogeyman such as an *Extinction Level Event* by way of a worldwide environmental *Armageddon* scenario.

The primary way that the *Global Warming* hoax is still believed by so many is through the constant geoengineering of catastrophic weather events, so-called natural disasters that are linked to warming, and other mishaps that cause environmental devastation. Through the absolute control of all the major MSM organs of propaganda, the citizenry is continually overwhelmed with misinformation, disinformation and false information that feed this vital NWO meme.

Everything about this ongoing conspiracy to support the fake *Global Warming* narrative is geoengineered from beginning to end. Of course, there's no better place than California to stage a dramatic hoax of such magnitude since the C.I.A. actually owns and operates all of Hollywood... as it completely controls Silicon Valley...as well as the statewide MIC.

---

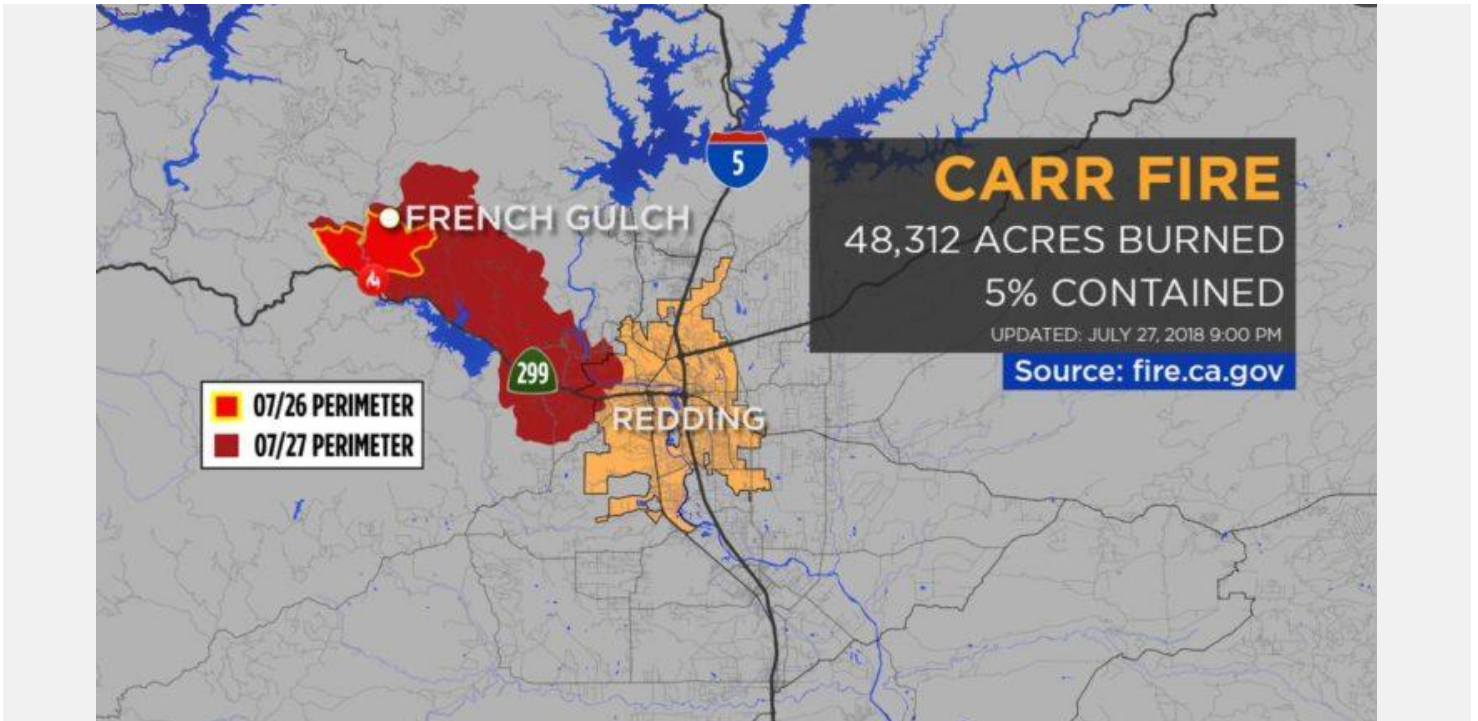

**KEY POINT:** Is there any better way to promote the *Global Warming* hoax than to periodically burn up a whole state with raging firestorms? The wildfires only burn so fast and furiously because of the *Great Drought* which is due to excessive heat and lack of rain. What better natural disaster is there to prove the existence of *Global Warming* than out-of-control wildfires. The bigger and scarier the fires the more the Hollywood elites perpetuate the official myth all over the world. Likewise, the Sultans of Silicon Valley further spread this fictitious narrative via so many vectors of dissemination on the Internet. All of them predictably ignore this following reality: [Geoengineering Is The Primary Cause Of Global Climate Change, Not CO2](#)

---

## California Wildfire Season 2018

As has been the case since California first underwent the *Great Drought* that began with the 2011 term of Governor Jerry Brown, wildfire season seems to be getting progressively worse and longer by the year. Clearly this hapless development is by purposeful design. It's also

quite curious that this annual plight occurs in such a rich state that could have taken many preemptive measures to prevent the worst case scenarios from blowing up out of nowhere. (e.g. the ongoing Carr fire has been distinguished for creating its own weather. [Carr Fire Intensifies By Creating Its Own Weather](#))

See how the Carr Fire literally exploded over the course of one day.

That, right there, is the dead giveaway. Most of these wildfires seem to just suddenly manifest and then they explode into immense conflagrations. On the way, these highly suspicious fires are helped along by incendiary firestorms the likes of which have never been seen before by Californians, especially those who have lived there for several decades. Even President Trump has declared a state of emergency in Northern California, a measure not taken very often. [Trump Declares State Of Emergency As “Apocalyptic” Wildfire Devastates Northern California](#)

What follows is the current July map of fires that plagues the Golden State as it is slowly charred and blackened. This interactive map provides updated fire conditions by the day and can be a good resource for those navigating in and around or through the state.

It's virtually impossible to understand the speed of and complete destruction that is wrought in the wake of these geoengineered firestorms. Even photos do not do them justice since smoke and ash are always left in their aftermath when the photographers are long gone. Here's one photo-documentary that captures the scenes quite poignantly. [Northern California Sees Massive Geoengineered Wildfires \(Photos\)](#)

Nothing scares people away from the land like wildfires. Even when the brush or trees grow back, the same situation can occur all over again. It all depends on who's starting the fires and why. It really depends on “*location, location, location*” according to the various UN and PPP

agendas such as *Vision2050*. As they say, whoever controls the weather effectively controls the world.

## **UN Agendas**

If anyone really wants to get to the bottom of many of these fires, they need look no further than the UN agendas—*Agenda 21* and *2030 Agenda for Sustainable Development*. Both of these global programs were conceived as a way to move people off the lands that the power elite covet. There are actually many reasons why certain swaths of land and geographic areas are so highly valued.

When there are corporate interests involved, the motives may be purely economic and/or financial. Oftentimes they may proceed in an ultra-capitalistic manner that can be highly predatory in nature (i.e. scare the people off their property via enviro terrorism). When a consortium advocacy is made up of seemingly benign enviro NGOs, they are usually acting on behalf of the wealthy elite. Sometimes it's a group of billionaires, other times it's an international crime syndicate.

The essential point is that so much governmental corruption and private sector criminality now occur under the rubric of *Agenda 21* and *2030 Agenda for Sustainable Development*. A more recent example of the highly organized collusion between U.S. Federal Government and Corporate America and NGOs (non-governmental organizations) are the rapidly evolving Public Private Partnerships.

At the current rate of 'development', it's only a matter of time before what's left of the planetary landscape, seascape and aircscape is totally controlled by these Public Private Partnerships.

## **California: Global Epicenter for Geoengineered Environmental Terrorism**

**Why was California chosen to be the epicenter for so much environmental terrorism?**

**Because it's California.**

**You know: the forever trend-setting state. Everything happens first in California... .. and then is picked up by the other states in the union. The controllers first experiment in California to see how a clandestine plan or stealth initiative or secret scheme will pan out. Then they tweak it before they attempt to roll it out across the country. Here's just one example: **FIREGEDDON: Geoengineered California Firestorms Propagated to Terrorize and Manufacture Consent****

**That the NWO globalists literally own and operate the Golden State is without dispute. The cabal even made sure super-loyal globalist and Jesuit-trained Jerry Brown was in the California's Governor's Mansion during this critical period of carrying out their *New World Order* agenda. This governor doesn't, in any way, work for the people of California; rather, he works hard to implement every single UN program in sight. That's why the state is such an overwhelming mess starting with the illegally open borders. What else could be expected from such a deliberately set-up political predicament overseen by a supranational body like the UN?**

---

Special Note: It's of paramount importance to understand how much the UN agendas have been advanced under the leadership of Governor Brown. The *Great Drought* officially began the January he took office in 2011 by purposeful design. This statewide calamity provided the bogus justification for Brown to push for UN-written climate change legislation. (Was the California drought geoengineered to pass future 'climate change' legislation?) The betrayal became more transparent when Brown refused to address the true causes of the drought even after he received the hard evidence on his desk. (California Governor Has Received Hard Evidence Proving Drought Was Geoengineered) As a matter of historical fact, so much naked corruption and criminality has occurred on Brown's watch that a serious movement has grown to evict him from office. See: CA Governor Jerry Brown Being Recalled By Furious Grassroots Movement

---

When you add to the mix the annual wildfires crisscrossing the state, the forever alternating droughts and deluges, the endless mudslides and sinkholes, the constant threat of earthquakes like *THE BIG ONE*, monstrous methane gas leaks like Aliso Canyon, spillway failures like the one at Oroville Dam, nuclear waste disasters such as San Onofre Nuclear Generating Station, etc., etc., etc. You get the picture!

California was actually set up to be a never-ending disaster movie ... for the entire world to watch. In this fashion, much of the world's attention is riveted on the state and, therefore, always receiving various messages through the mainstream media. Unfortunately, most of those messages are advancing the UN agendas without many folks ever knowing about it.

## Directed Enemy Weapons

There's no question that Directed Energy Weapons (DEWs) have been used to start fires of every sort and kind in California and elsewhere over the years. Greece just had it own

**Firegeddon — caused by DEWs — that has ravaged large swaths of residential areas. Greece Attacked With Directed Energy Weapons (Video)**

However, it's in California that the pyro-terrorists really love to test their newfangled pyro-weaponry. **See: 500 Trillion Watt Laser Created In California (Video)** The hard evidence from last year's apocalyptic CA firestorms proved this fact conclusively. Massive, out-of-control wildfires are even jumping off out of the normal fire season. **"Wildfires have never occurred like this in Southern Cal DURING DECEMBER."**

Melted aluminum hub caps in Larkfield, a suburb of Santa Rosa, CA after the 2017 geoen지니어ed firestorms

The following video exposé presents irrefutable proof of the high-powered laser weaponry used to trigger some of the 2017 California fires, as well as to inflict extraordinary damage never seen before. How, after all, are hub caps melted in the street by a fire that does not even burn the trees and buildings a few feet away from the vehicles?! Likewise, how are laser-like bore holes showing up in the car hoods and in other metal components?

**Visible Proof Lasers Were Used in 2017 California Fires (Video)**

---

The aftermath of the California fires, both now and then, actually provide so much evidence of chemical geoengineering, directed energy weaponry, and arson activity that the CA state government must be a co-conspirator. To effectively cover up these environmental terror events requires an enormously coordinated effort between the military perps, government officials and mainstream media.

The delivery systems for these various weapons range from prepositioned low-level satellites, helicopters camouflaged as firefighting efforts, highly sophisticated DEW drones and state vehicles equipped with DEW technology. Gladio black ops of this nature basically have access to the most advanced weaponry in the DEW arsenal because NATO basically controls the U.S.

military. Hence, acts of environmental terrorism carried out on American soil by Operation Gladio are immune from investigation and/or prosecution. When carried out in this manner, the U.S. Federal Government also enjoys “plausible deniability” should the plots be exposed.

## **Conclusion**

**Bottom Line: CALIFORNIA WILDFIRES — Geoengineered Firestorms Terrorize to Advance the Agenda(s)**

Once they perfected their weather weaponry, the geoengineers couldn't resist the temptation to experiment with it. Acting on orders from their NWO masters, they've actually been waging weather warfare against humanity since the end of World War II. Many of the weather weapons were originally invented and developed in California as there are many secret military testing labs around the state. Some of these weather weapon laboratories work with the different universities such as California Polytech and Stanford, UCLA and USC.

Not only do the geoengineers conduct massive chemical geoeengineering operations all over North America whenever they want to, they also have access to numerous satellite-based, land-based and sea-based HAARP technologies. Chemtrails and chembombs have become ubiquitous sky features everywhere these days. When these are used in tandem with NEXRAD's Dopplar radar stations and power plant water vapor generators, the geoengineers are able to manipulate weather patterns at will. Welcome to weaponized *Global Climate Change!*

**NEXRAD Radar at the WSR-88D Radar Operations Center in Norman, Oklahoma**

**While one state is experiencing deluge after deluge, another state might be experiencing a 500 year drought. Moisture is often pulled from one geographic area and stationed over another. This is why so much of the USA has been tormented by such wide weather extremes for many years. The geoengineers are constantly experimenting on US and trying out new techniques. Some of these include technologies so advanced they have never been revealed to any party outside of those who developed and utilize them.**

**With the introduction of 5G throughout the fifty states, the potential to ramp up localized weather modification will increase considerably. The major metro areas, in particular, will find themselves under continuous assault by massive frequency generators. It's not only the weather and seismic activity that are being manipulated, it's also the populace that is being assailed by specific electromagnetic frequencies designed for mass mind control. For at the end of the day, this is what the controllers truly seek—a completely controlled**

population. Then, and only then, can the UN agendas become a worldwide reality. Therefore, it's time for *We the People* to formulate an action plan.

## Action Plan

***“Chemtrails must be stopped  
by every means possible!”***

***Geoengineering must be terminated  
by any means necessary!”***

***“5G must be opposed  
before it's operational nationwide!”***

***Directed Energy Weapons must be outlawed  
with all deliberate speed!”***
