

Morgellons, Chemtrails, Depopulation, Transhumanism Connections & Solutions

December 31, 2014

“Morgellons is an umbrella term which is used to identify a score of different symptoms. Ultimately it is transhumanism. The integration of mankind with machines, computers, and artificial intelligence.

Morgellons is not a disease. It is a process. It is a form of forced/directed evolution of the human genome. It is the fetal stage of transhumanism, and it is upon us.

This stealth project is being carried out with the use of the daily chemtrail operations, which are happening globally. There is no escape. The chemtrail operations are terraforming the earth and everything on it, including you.

Many have died. While the CDC and Kaiser Permanente drag their heels with its so-called study, humans are perishing, suffering “unbelievable” symptoms and are left alone with nowhere to turn.

Countless patients have been improperly diagnosed with “Delusions of Parasitosis.”

Just before the “explosion” of Morgellons here in the United States, the CDC sent letters out to physicians across the country stating that they were seeing an increase of patients with DOP. Coincidence? I think not. They were covering their tracks, so to speak.

Last I knew, delusions do not cause oozing skin lesions, flying insects, worms, fungus, molds, plants, colored fibers and fiber bundles, polka-dotted, multi-colored plaques or crystals of different shapes/colors. These are just a few of the symptoms associated with this mutation process, based on one’s genetic pre-disposition.

Morgellons sufferers are far from delusional. They are outsourced bioresearch test subject for the Global Governments, and so are you.

Independent researchers are learning a vast amount of knowledge about this entity and are putting the pieces together. It appears to have protein involvement as well as many different organic species and possibly nanotechnology/biosensor involvement.

It is slow, invasive and progressive.

Hundreds of samples have been obtained from people who show no outward

symptoms of the mutation. The same specimens have been found with people who are noticeably infected, as well as in environmental sampling.

Imagine finding a black speck sprouting a blue fiber from a strange layer of skin that has formed over one of your open skin lesions. Then imagine finding the same black speck and the same blue fiber on a grain of rice. I did. It was impossible to distinguish which came from my skin and which was from the rice.

Transhumanism through terraforming.”

Kandy Griffin Vandawalker

Morgellons Research Group President

Chemtrails & Depopulation

“For the sake of efficiency and cost effectiveness, as well as to be able to morally defend and justify their actions, each method has multiple purposes, both positive and negative.

Chemtrails , long denied but finally admitted by the Fifth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC), are used to reduce greenhouse gasses already in the atmosphere by serving as a carbon capture and sequestration method and as a solar radiation management method. They accomplish the former with sulphate aerosols that chemically bind the carbon dioxide in the atmosphere into a mineral carbonate that falls to the ground, and the latter by increasing the planet’s albedo (reflectivity) with albedo-enhancing particles such as aerosolized aluminum that form temporary clouds and divert solar radiation back into space.

The second and never stated purpose of chemtrails is to increase the presence of aluminum and other toxic metals in human environments so they are ingested in unnaturally high quantities to cause neurodegenerative illnesses and shorten the lifespan of the baby boom generation at a time when the developed world has reached the fourth and last stage of the demographic transition as a result of six decades of covert interference with human reproduction via covert chemical methods (fluoride, bisphenol A and other endocrine disruptors), which has resulted in inverted population pyramids and thus economically unsustainable population profiles characterized by more old than young people and too few working adults to be able to support the dependent population. As a bonus the aluminum sprayed by plane over our heads also binds with fluoride in water forming aluminum fluoride which is a far better sterilizer than just fluoride therefore reducing the need to add fluoride to drinking water. Third, aluminum poisons the soil and makes it inhospitable to traditional or heirloom seeds thus

forcing farmers to buy aluminum-resistant genetically modified seeds that are the latest weapon in the sterilizing arsenal of the depopulation lobby.”

Morgellons, Chemtrails, Depopulation, Transhumanism Connections & Solutions

Now more than ever, it is time to connect the dots that have purposely been compartmentalized for a reason. When we are overly focused in one area, it can be difficult to see the overall connections. At first it can become overwhelming when diving into numerous fields of study, but when you see the patterns begin to repeat themselves (create perceived problem, so you can offer a solution that further enslaves those it claims to protect) and continue to observe from the micro and macro levels, a bigger picture begins to form. There are many pieces to the transhumanism puzzle agenda. We share this to expose and dismantle the systems being built on a nano-level with technologies that are basically out of sight & mind, silent, covert and deadly. An agenda so sinister that it literally had been set out to extinct our human family.

What do we do about it? First lets inner-stand that this is a frequency war. Our bodies are being targeted with genetically modified foods (not labeled on purpose thanks to Monsanto), fluoridated water which not only calcifies the pineal gland, but also sterilizes men, women and children. We are constantly bombarded with cell, microwave and radio frequencies. We are sprayed almost daily with chemical particulates that we ingest from our air via overhead aerosol chem-planes. Most of the population is on some form of pharmaceutical drug due to a misinformed medical community that prescribes chemicals to combat symptoms that may or may not be the actual disease but mimic the same symptoms, instead of looking at causation and directly dealing with the core issue, which is a toxic body crying out for help.

When we detox the body, we not only relieve it of the numerous symptoms that have us running to the doctor for help, we also return clarity and creativity back to the mind so we can be more proactive in our approach to a happy and healthy life.

The first step in healing is to acknowledge something is broken. Our food, water, air and mind have been under severe attack.

The next step is to remove the causation to the best of our ability and then share this as delicately as we can with our friends, family and community. It is not enough to get upset at what has been occurring quietly beneath the surface. We must get into action ourselves and model health to those we love to inspire them

to do the same. It is not difficult or expensive to heal our bodies and we share many ways to do this in our detox section of the website.

<http://www.acalltoactions.com/#!detox/c7w9>

Some simple and inexpensive ideas that we incorporate into our daily routine:

Reverse Osmosis (non-fluoridated water)

Turmeric (a spice that has numerous healing effects)

Local honey (reduces allergies)

Hot water with an organic lemon (liver detox)

Reishi mushroom (immunity, clarity, liver detox)

Raise Your Frequency (how you think affects your experiences)
