FDA Drug War? – Murdered Doctors Discovered Why Vaccines Cause Autism ²

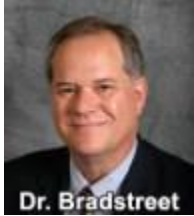

Drug Cartels and Drug Wars in America

Dr. James “Jeff” Bradstreet shot in the chest. Murder or Suicide?

Published on Jul 23, 2015

Anti-vaccine doctor behind ‘dangerous’ autism therapy found dead. Family cries foul.

Dr. Bradstreet “On the afternoon of June 19, a fisherman spotted Bradstreet’s lifeless body lying in the Broad River in the tiny town of Chimney Rock, N.C. He had a gunshot wound to his chest, authorities said. A gun was found in the water nearby.

The Rutherford County Sheriff’s Office said it is investigating Bradstreet’s death, but that the wound appears to have been self-inflicted.

Bradstreet’s family, however, has set up an online account to raise funds for “an exhaustive investigation into the possibility of foul play.”

GcMAF Provides your body’s own internal medicine

The protective protein, GcMAF empowers your body to cure itself. In a healthy person your own GcMAF has 11 actions discovered so far, including two on cells, three excellent effects on the brain, and 6 on cancer. Amongst these it acts as a “director” of your immune system. But viruses and malignant cells like cancer send out an enzyme called Nagalase that prevents production of your GcMAF: that stops its 11 beneficial effects, and neutralizes your immune system. So diseases become chronic, and cancer cells grow unchecked.

Dr. Bradstreet and others discovered that “Nagalase” in vaccines was causing autism and other illnesses by suppressing the natural GcMAF

Nagalase is a protein made by all cancer cells and viruses. Vaccines that contain Nagalase suppress the natural GcMAF that protects the immune and nervous system. This finding is easily seen as a major economic threat to Big Pharma and the Medical Industrial Complex.
