

100x Reporting Limit Aluminum, 3x Barium in CA Rain Tests: Chemtrails, Geoengineering

POSTED ON MAY 23, 2016

By Cassius Kamarampi

(Era of Wisdom) Thanks to Stop Spraying us San Francisco, 2016 rain tests were finally performed in the geoengineering hotspot of Sacramento, California.

This is where I saw (and experienced the symptoms of) the worst chemtrails I've ever seen. [Above] is a picture of the sky in Sacramento on March 15th.

According to Stop Spraying us San Francisco:

“Aluminum was found at almost 100 times reporting limits – an astonishing 4,700µg/L – in Sacramento rain collected May 5th, 2016.

Lisa DeFinis writes “This sample was collected on 5/5/16 at approximately 10AM in Sacramento, CA, by the airport. We had just suffered 2 days of extremely heavy spraying and it was raining and hailing at the time. I collected it in a sterile cup that I had purchased for this.”

Barium was over three times the reporting limit (64µg/L) while strontium was more than double its reporting limit (44µg/L).

Thank you Lisa. If anyone else has noteworthy rain/snow/whatever analyses, please send them to me. If you'd prefer to be anonymous, I can take your name and/or address off it, but I feel it's best to be open. We have nothing to hide – it's the other team who conceal, mislead and outright lie. Ours is the side of truth, and I'm happy to be able to say yes, I want clean fresh air untainted by their evil crap.”

Metals by EPA 200 Series Methods

Analyte	Result	Reporting Limit	Units	Dilution	Batch	Prepared
Rain Sample (CZE0238-01) Water Sampled: 05/05/16 10:00 Received: 05/05/16 12:15						
Aluminum	4700	50	µg/L	1	CZ03215	05/06/16
Barium	64	20	"	"	"	"
Strontium	44	20	"	"	"	"

The rain tests were taken near the airport, shown here on the map in North Sacramento.

Photographic evidence, rain tests, all of this should obliterate any shred of skepticism that geoen지니어ing is occurring here.

If you need more to ponder over, just take a look at Yosemite being decimated by it. Nuclear physicist J. Marvin Herndon's study theorizing about aerosolized coal fly ash being the base material for geoen지니어ing would be good reading material. You could read *"The Geoen지니어ing Escalation of 2016,"* Era of Wisdom's contribution in documenting the easily observable escalation of geoen지니어ing activity since about January 2016.

To comprehend this it helps to have firsthand experience smelling and tasting them, so pay close attention to what your nose detects every day and please share this with as many people as possible.

Here are more videos of geoengineered skies in Sacramento.
